

## LKYCIC Working Paper Guidelines

The Lee Kuan Yew Centre for Innovative Cities (LKYCIC) welcomes original submissions (that is, previously not published materials) that contribute to our research agenda. They can be on relevant topics in any of the LKYCIC research priorities:

- Demographics
- Density
- Sustainability
- Resilience and Risk
- Mobility and Connectivity
- Social Capital

Papers in this Series are intended for sharing new and exciting research, reporting preliminary research results and ideas so as to stimulate critical discourse on innovative cities. These can be research in progress or thought pieces.

We place a premium on clear, concise, readable writing, careful research and analysis, logical and systematic presentation of materials. Papers must be written in English and should be between 6000 and 8000 words in length, including footnotes and references.

While there is no formal refereeing process, submissions will be read by members of staff, edited where appropriate and authors may be asked to make changes before they are accepted for publication.

Those who wish to submit a working paper for consideration are asked to follow the style guidelines below:

### Submissions
